

3 Good Reasons, why YOU should also use b&m direct screwing systems...

1. Customer Driven Development

Your requirements for a component connection cannot be met with commercially available technologies?

We will jointly develop a suitable product with you!
b&m turns your fastening element into a real problem solver.

2. Groundbreaking Products

Do you want to set new standards with your technical applications?

Our self-sealing screw connections, thread-forming (repair) nuts or corrosion-resistant screws for CFRP materials have a lot to offer! b&m provides an extensive portfolio of specialized direct screwing systems.

3. Made in Germany

Best-in-class precision and quality is important to you?

Get to know our company headquarters in Ober-Ramstadt – here fasteners are manufactured with state-of-the-art, partly self-developed machines, all while being process-monitored and operated in a sustainable manner! b&m helps your assembly line to achieve the zero-defect target.
